TEHOPESU
SUPER CLEAN FOR TERRACES AND FURNITURES.

DESCRIPTION
Oxidizing cleaning agent. Patented product, FI120542, SE529353.

RECOMMENDED USES
For cleaning various interior and exterior surfaces. Tehopesu has a bleaching effect on darkened/weathered wood.

PRODUCT FEATURES
Ideal for cleaning and refreshing treated and untreated surfaces, such as wooden terraces, fences, walls, garden furniture and grates, and for cleaning plastic surfaces.

APPLICATION INSTRUCTIONS

Mixing components
Stir a can (0.5 l) of Tehopesu into 5 liters, or 1 liter of Tehopesu into 10 liters, of cool water in an open plastic container. Use the entire contents of the can at once. Let stand for about 15 minutes. Mix again before use. The solution should be used in 2–4 hours from the dissolution of the last granule. The ready-to-use solution is alkaline (pH >10).

Surface preparation
Wear suitable protective clothing, protective gloves, safety goggles or a face mask. Protect plants against splashes. Take care not to splash the product on clothes and untreated furniture, for example. The product has a slight bleaching effect.

Apply a generous coat of the solution with a brush or a roller onto the surface and allow to work for 15-30 minutes. Allow to work for around 10 minutes on hardwood surfaces and furniture. To obtain an even end result, keep the surface being treated moistened with Tehopesu by adding more solution when necessary. In warm and sunny weather you can moisten the surface first with water so that the product will not dry too quickly. Extremely dirty/discolored surfaces can be treated several times. Avoid splashing the product on clothes, plants or your face.

Brush or clean the surface using a pressure washer and rinse carefully with water. Avoid excessive pressure when cleaning with a pressure washer, particularly when washing old wood, as it will splinter easily. Use a washing method that will not scratch the surface (such as a scrubbing brush, scouring pad, fine stainless steel mesh or similar). The treatment will leave wood fiber on wood surfaces. These can be easily removed using the above-mentioned tools once the surface has dried.

We recommend maintenance painting for painted surfaces treated with Tehopesu.

Aftercare
We recommend painting painted surfaces after treatment with Tehopesu.

Cleaning of tools
Clean tools with water.
