TIKKURILA
UNICA SUPER 20
DURABLE URETHANE ALKYD LACQUER / SEMI-MATT

DESCRIPTION
Quick drying urethane alkyd lacquer. Contains a UV-protective agent which slows down the yellowing effect caused by sunlight. Tinted product gives better protection against sunlight than untinted product.

RECOMMENDED USES
Boats, furniture and floors that are subject to light mechanical and chemical stress.

PRODUCT FEATURES
Suitable for application on interior and exterior wooden surfaces.

The above information is not intended to be exhaustive or complete. The information is based on laboratory tests and practical experience, and it is given to the best of our knowledge. The quality of the product is ensured by our operational system, based on the requirements of ISO 9001 and ISO 14001. As manufacturer we cannot control the conditions under which the product is being used or the many factors that have an effect on the use and application of the product. We disclaim liability for any damages caused by using the product against our instructions or for inappropriate purposes. APPLICATION INSTRUCTIONS

Application conditions
The surface to be varnished must be dry. The temperature of the air at least +5 ºC, and the relative humidity of the air below 70 % during varnishing and drying. Do not apply during strong sunlight or during damp and cold weather. Time the work so that the lacquer film will have enough time to dry before evening dew.

Surface preparation
Unvarnished surface:
Clean the surface by removing any dirt and dust. Wipe hardwood surfaces with White Spirit 1050 before surface treatment. Always prime exterior wooden surfaces, that are subjected to the weather, with Valtti Pohjuste priming oil prior to applying lacquer.

Previously varnished surface:
Wash the surface with Maalipesu cleaning agent and rinse carefully with water. Remove old/loose lacquer with a scraper. Sand the whole surface and remove sanding dust.

Lacquering
Lacquer priming:
Stir the lacquer thoroughly before use and occasionally during use. Prime new surfaces with Unica Super 90 full-gloss thinned with 20 % white spirit. If you want a colored surface, tint the priming lacquer to the same color as the finishing lacquer. Finish evenly by applying 1-2 thin coats of unthinned lacquer. Apply 1-2 coats of unthinned lacquer directly onto previously lacquered surfaces. Apply evenly and thinly. Sand the surface lightly between coats.

Maintenance lacquering:
Check the condition of the lacquered surface and perform maintenance treatment as necessary, especially with surfaces subjected to the weather. The maintenance interval of a tinted product is longer than that of a colorless product. Surfaces varnished with Unica Super can be maintenance lacquered with the same or similar solvent-borne lacquer. See pretreatment.

Cleaning of tools
Clean tools with White Spirit 1050 or Tikkurila Pensselipesu (Tool Cleaner).

Maintenance instructions
If needed, approx. 1 month after lacquering at the earliest:
Clean surface with a neutral (pH 6-8) dish-washing agent and a soft brush, sponge or a cleaning cloth. Clean very dirty surfaces with a mild alkaline (pH 8–10) cleaning solution and e.g. a cleaning cloth, mop or sponge. Rinse the surface carefully.

The product achieves its final hardness and durability after one month under normal conditions, therefore the surfaces must be handled with care during a couple of weeks. If the surfaces need cleaning soon after surface treatment, clean them lightly using a soft brush, a damp cloth or a mop.

Maintenance treatment
Observe the condition of the exterior surface and recoat when necessary. Longer maintenance interval can be obtained with a tinted product compared to a colourless product. Surfaces lacquered with Unica Super can be maintenance lacquered with Unica Super or same kind of solvent-borne lacquer.

UNICA SUPER 20

Environmental and waste disposal
Avoid spillage into drains, water systems and soil. Destroy liquid waste according to the local regulations for hazardous waste. Recycle empty, dry cans or dispose them of in accordance with local regulations. Note! Risk of self-ignition of used cleaning rags, paper wipes etc. Contaminated materials can create fire some hours later and should be soaked in water and placed in a closed metal container before disposal.

HEALTH AND SAFETY LABELLING according to Regulation (EC) No. 1272/2008
Contains: Naphtha (petroleum), hydrotreated heavy. WARNING. Flammable liquid and vapor. Causes skin irritation. May cause drowsiness or dizziness. Harmful to aquatic life with long lasting effects. Contains ethyl methyl ketoxime. May produce an allergic reaction. If medical advice is needed, have product container or label at hand. Keep out of reach of children. Keep away from sparks and open flames. - No smoking. Avoid breathing mist/vapors/spray. Use only outdoors or in a well-ventilated area. Avoid release to the environment. Wear protective gloves.
