Akvi Color AT-S

DESCRIPTION
A water-borne stain.

PRODUCT FEATURES AND RECOMMENDED USES
• A water-borne stain with UV and sunlight resistant pigments. The stained wood will retain its color considerably longer. The product is designed for interior use.
• Can be used in Nordic Swan Ecolabeled buildings. As a water-borne product, it does not harm the environment.
• Enhances the appearance of natural wood structure. Due to the wide range of colors, it is easy to make the end product more unique. Natural-looking color samples on wood available by request.
• Designed for spraying and dipping.
• The stain does not contain free formaldehyde and after drying it does not emit formaldehyde to the environment.
• Recommended for furniture, doors and other wood and wood fibre surfaces indoors.

TECHNICAL DATA

Volume solids 2–20%, depending on the color
Weight solids 3–25%, depending on the color
Specific gravity 0.99–1.1 kg/litre depending on the color.

Recommended spreading amounts and theoretical coverage
10–20 m²/l depending on the color. Practical coverage depends on the application method, painting conditions and the shape and roughness of the surface to be coated.

Drying times

<table>
<thead>
<tr>
<th>80 - 100 g/m²</th>
<th>+20°C</th>
<th>+50°C</th>
<th>+70°C</th>
<th>IRM</th>
</tr>

<tr>
<td>Recoatable, after</td>
<td>30min</td>
<td>15min</td>
<td>10min</td>
<td>5min</td>
</tr>
</tbody>
</table>

Drying and recoating times are related to the film thickness, temperature, the relative humidity of the air and ventilation.

Color shades
Shades from the Akvicolor AT colour cards and several colours by request. The product belongs to the Akvi Tone -tinting system.
## Akvi Color AT-S

### APPLICATION INSTRUCTIONS

#### Surface preparation
Remove dust, loose particles and other impurities from the surface. Wood surfaces must be sanded with sandpaper P150–320. Sanding prior to the next application with sandpaper P240–400. All sanding dust must be removed.

Note! The roughness of the sandpaper also effects of shade.

#### Recommended topcoats

Note! Different kind of topcoats might be changed the color shades.

#### Application conditions
The surface to be treated has to be clean and dry. The moisture content of wood has to be below 20%. During application and drying temperature of the air, substrate and product must be over +18°C and relative humidity of the air below 70%. Good ventilation is required to ensure optimal result. Product can be dried with or without oven.

#### Application
Stir the stain carefully before use. Different application methods may result in shade variations. The shade and hue of the stain should be verified before applying large surfaces.

For conventional spraying, the product is thinned approximately 0–10%. Recommended nozzle tip is 1.0 –1.4 mm and pressure 1–3 bar. Spray angle shall be chosen according to the shape of the object.

For dip coating the product is not thinned.

#### Thinners
Water

#### Cleaning of equipment
Water.

#### VOC
The Volatile Organic Compounds amount is 100 g/l of stain.

### HEALTH AND SAFETY
Containers are provided with safety labels, which should be observed. Further information about hazardous influences and protection are detailed in individual health and safety data sheets.

A health and safety data sheet is available on request from Tikkurila Oyj.
