A kvilac FD-J 25

DESCRIPTION
A water-borne, one-component acrylate lacquer.

PRODUCT FEATURES AND RECOMMENDED USES
- Developed especially for the joinery industry. The lacquer is an excellent solution when high cost-effectiveness is required from the production line.
- M1-classified, economical all-round lacquer for interior use. This transparent lacquer can also be used on top of dark stain colors. The product is designed for fast production lines.
- Excellent blocking properties and chemical resistance. The lacquer protects surfaces in indoor applications.
- The M1 classification for low-emitting building materials has been granted by the Finnish Building Information Foundation RTS.
- Can also be used as a sealer under water-borne UV-lacquer, see page 2.
- A very fast-drying lacquer.
- Suitable for mouldings, panels, doors and other wooden surfaces.

APPLICATION INSTRUCTIONS

Surface preparation
Remove dust, loose particles and other impurities from the surface. Wood surfaces must be sanded with sandpaper P150–320. Sanding prior to the next application with sandpaper P240–400. All sanding dust must be removed.

Recommended primers
Akvilac FD-J 25.

Recommended topcoats

Application conditions
The surface to be treated has to be clean and dry. The moisture content of wood has to be below 18%. During application and drying temperature of the air, substrate and product must be over +18°C and relative humidity of the air below 70%. Good ventilation is required to ensure optimal result. Product can be dried with or without oven.

Application
Stir the lacquer carefully before use. Avoid flotation. Thin with water to the viscosity required.

For air-assisted airless spraying, the product is thinned approximately 0–5% to the viscosity 40–60s (DIN4). Recommended nozzle tip is 0.009”–0.013” and pressure 40–120 bar. Atomising air pressure should be about 1–3 bar. Spray angle shall be chosen according to the shape of the object.

For conventional spraying, the product is thinned approximately 0–5% to the viscosity 40–60s (DIN4). Recommended nozzle tip is 1.4–1.8 mm and pressure 2–3 bar.

Thinners
Water

Cleaning of equipment
Water.

VOC
The Volatile Organic Compounds amount is 20 g/litre of paint mixture. VOC content of the paint mixture (thinned 5% by volume) is 19 g/l. VOC 2004/42/EC (cat A/e) 130g/l (2010)

HEALTH AND SAFETY
Containers are provided with safety labels, which should be observed. Further information about hazardous influences and protection are detailed in individual health and safety data sheets.
A health and safety data sheet is available on request from Tikkurila Oyj.
