Recommended spreading amounts and theoretical coverage

Practical coverage depends on the application method, conditions and the shape and roughness of the surface to be treated.

Drying times

Thin filling layer can be sanded after 4 hours and deeper filling layer after 24 hours.

Gloss

Matt.

Color shades

Birch, birch knot, pine, pine knot, oak, oak knot, beech, white and mahogany
Colowood

APPLICATION INSTRUCTIONS

Surface preparation
Remove dust, loose particles and other impurities from the surface.

Recommended topcoats
Can be recoated with Tikkurila’s water-borne, water-borne UV and solvent-borne products.

Application conditions
The surface to be treated must be dry, the temperature of the air at least +5ºC and the relative humidity of the air below 80%.

Application
Apply with a spatula. Thin with water, if necessary. Fill large holes preferably twice or several times. Sand the surface and remove sanding dust.

Thinners
Water

Cleaning of equipment
Water.

VOC
The Volatile Organic Compounds amount is 21 g/litre of putty. VOC content of the putty (thinned 10% by volume) is 20 g/l.

HEALTH AND SAFETY
Containers are provided with safety labels, which should be observed. Further information about hazardous influences and protection are detailed in individual health and safety data sheets.
A health and safety data sheet is available on request from Tikkurila Oyj.
