Fontelac QD 80

DESCRIPTION

A water-borne, one-component glossy topcoat based on alkyd dispersion.

PRODUCT FEATURES AND RECOMMENDED USES

• As a one-component product, Fontelac QD 80 is easy to use. The water-borne product suits well for touch-up painting in indoor areas
• The colour range of the product is almost unlimited
• Forms a tough and durable surface with good gloss and colour retention
• Suitable for product painting in metal industry and for painting stations
• Not suitable for immersion or constant humidity
• Recommended to be used especially as a glossy finish for small tanks, agricultural machinery, haulage equipment and other machinery and equipment

TECHNICAL DATA

Volume solids

37±2% (ISO 3233)

Weight solids

52±2%

Specific gravity

1.2±0.1 kg / l

Recommended film thicknesses and theoretical coverage

<table>
<thead>
<tr>
<th>Recommended film thicknesses</th>
<th>Theoretical coverage</th>
</tr>

<tbody>
<tr>
<td>wet</td>
<td>dry</td>
</tr>
<tr>
<td>90µm</td>
<td>35µm</td>
</tr>
<tr>
<td>150µm</td>
<td>60µm</td>
</tr>
</tbody>
</table>

Practical coverage depends on the application method, painting conditions and the shape and roughness of the surface to be coated.

Drying time

<table>
<thead>
<tr>
<th>DFT 40µm</th>
<th>+15°C</th>
<th>+23°C</th>
<th>+60°C</th>

Temaspeed Fonte tinting.
Fontelac QD 80
APPLICATION INSTRUCTIONS

Surface preparation
Primed surfaces: Oil, grease, salt and dirt are removed from the surface by appropriate means. Repair any damage to the primer coat. Note the overcoating time of primer. (ISO 12944-4)

Recommended primers
Fontecryl AP, Temaprime EE, Temaprime EUR, Temaprime GF.

Recommended topcoats
Fontelac QD 80.

Application conditions
All surfaces must be clean, dry and free from contamination. The temperature of the ambient air, surface and paint should not fall below +10ºC during application and drying. Relative humidity of the air should not exceed 70% during application and drying. The surface temperature of steel should remain at least 3°C above the dew point. Good ventilation and sufficient air movement is required in confined areas during application and drying.

Application
Stir the product carefully before use.

For airless spraying, the product is thinned approximately 0–5%. Recommended nozzle tip is 0.011”–0.013” and pressure 120–180 bar. Spray angle shall be chosen according to the shape of the object.

For dip coating, the product is thinned approximately 0–15% to viscosity 20–25s (DIN4).

For brush application the product should be thinned according to the circumstances.

Thinners
Water

Cleaning of equipment
Clean the spraying equipment immediately after use as follows:
1. Run the equipment with water to remove excess paint from the equipment.
2. Run the equipment with a mixture of approx 20% Thinner 1109 in clean water, at least two times.
3. Finally wash with undiluted Thinner 1109.

Wash the equipment with water before starting to paint again. Unwashed equipment can cause serious surface defects.

Contact Tikkurila Technical Service for detailed instructions for cleaning 2-component application equipment.

VOC
The Volatile Organic Compounds amount is 80g/litre of paint.
VOC content of the paint (thinned 15% by volume) is 70 g/litre.

HEALTH AND SAFETY
Containers are provided with safety labels, which should be observed. Further information about hazardous influences and protection are detailed in individual health and safety data sheets.
A health and safety data sheet is available on request from Tikkurila Oyj.
