**Merit Sanding**

**DESCRIPTION**

A one-component acid-catalyzed lacquer.

**PRODUCT FEATURES AND RECOMMENDED USES**

- Fast-drying sealer with excellent sanding properties
- Contains a UV-protective agent, which helps retain the natural light color of the wood
- As a one-component sealer, Merit Sanding is very easy to use. The lacquer is also user-friendly, as it does not contain any aromatic solvents
- The emission level of this product fulfills the requirements of E1 classification for surface treatment materials. The product has been tested according to the standard EN 717-1, and its formaldehyde emission rate is less than 0.124 mg/ m² air
- Recommended for furniture, doors and other similar wooden surfaces indoors

Merit Sanding

APPLICATION INSTRUCTIONS

Surface preparation
Remove dust, loose particles and other impurities from the surface. Wood surfaces must be sanded with sandpaper P150–320. Sanding prior to the next application with sandpaper P240–400. All sanding dust must be removed.

Recommended topcoats
Merit 20, Merit 30, Merit 80, Merit Topas 25, Merit Rubin 25.

Application conditions
The surface to be treated has to be clean and dry. The moisture content of wood has to be below 18%. During application and drying temperature of the air, substrate and the product must be over +15°C and relative humidity of the air below 80%. Good ventilation is required to ensure optimal result. Product can be dried with or without oven.

Application
For airless spraying, the product is thinned approximately 0–20% to the viscosity 20–40s (DIN4). Recommended nozzle tip is 0.011”–0.015” and pressure 100–140 bar. Spray angle shall be chosen according to the shape of the object.

For air-assisted airless spraying, the product is thinned approximately 0–20% to the viscosity 20–40s (DIN4). Recommended nozzle tip is 0.011”–0.015” and pressure 40–120 bar. Atomising air pressure should be about 2–3 bar. Spray angle shall be chosen according to the shape of the object.

For conventional spraying, the product is thinned approximately 0–20% to the viscosity 20–40s (DIN4). Recommended nozzle tip is 1.4–1.8 mm and pressure 2–3 bar.

Thinners
Thinner 1033, Thinner 1035

Cleaning of equipment
Thinner 1033 or 1035.

VOC
The Volatile Organic Compounds amount is 640 g/litre of paint.

Maximum VOC content in ready to use paint (thinned 20% by volume) is 670 g/l.

HEALTH AND SAFETY
Containers are provided with safety labels, which should be observed. Further information about hazardous influences and protection are detailed in individual health and safety data sheets.
A health and safety data sheet is available on request from Tikkurila Oyj.
