Pinja Flex Combi 25

DESCRIPTION
A one-component water-borne polyacrylate paint with excellent adhesion properties.

PRODUCT FEATURES AND RECOMMENDED USES
- A fast-drying exterior paint for windows and doors. The paint forms an elastic film with low water permeability properties. These attributes help the product protect wood against moisture and dirt.
- Excellent adhesion to bare wood. The possibility to use the product both as a primer and a topcoat results in more efficient production. Good hiding power and filling properties ensure the high quality of the dry paint film.
- Beautifies wooden windows and front doors with thousands of durable colors.
- The M1 classification for low-emitting building materials has been granted by the Finnish Building Information Foundation RTS.
- Suitable for wooden window frames and front doors.

<td>2h</td>
<td>1h</td>
</tr>
</tbody>
</table>

Stacking temperature below +30°C.

Drying and recoating times are related to the colour shade, film thickness, temperature, the relative humidity of the air and ventilation.

Gloss
Semi-matt.

Color shades
The shades on the Wooden Facades colour card for exterior use. Avatint tinting system.
Pinja Flex Combi 25

APPLICATION INSTRUCTIONS

Surface preparation
Clean surfaces from dirt, dust and loose material. Assure that surface is free from mold and blue stain. Wood surfaces must be sanded with sandpaper P150–320. Sanding prior to the next application with sandpaper P240–400. All sanding dust must be removed.

Recommended primers
Pinjadur Primer, Pinja Flex Combi 25, Pinja Flex Isolator, Pinja Wood Stain.

Application conditions
The surface to be treated has to be clean and dry. The moisture content of wood has to be below 20%. During application and drying temperature of the air, substrate and product must be over +18°C and relative humidity of the air below 70%. Good ventilation is required to ensure optimal result. Product can be dried with or without oven.

Application
For airless spraying recommended nozzle tip is 0.011”–0.015" and pressure 80–160 bar. Spray angle shall be chosen according to the shape of the object.

For air-assisted airless spraying recommended nozzle tip is 0.011”–0.015" and pressure 40–120 bar. Atomising air pressure should be 1–3 bar. Spray angle shall be chosen according to the shape of the object.

Wood contains resin and other colouring extractives especially in knots. Temperature and humidity fluctuations may cause paint coat discolouration in these areas.

Thinners
Water

Cleaning of equipment
Water or Tikkurila Tool Cleaner.

VOC
According to VOC Directive 2004/42/EU the product subcategory A/d VOC limit (1.1.2010) is maximum 130 g/l. VOC content of the “Pinja Flex Combi 25” is 30±10 g/l.

HEALTH AND SAFETY
Containers are provided with safety labels, which should be observed. Further information about hazardous influences and protection are detailed in individual health and safety data sheets.
A health and safety data sheet is available on request from Tikkurila Oyj.
