Pinja Opti Primer

DESCRIPTION
A water-borne alkyd primer.

PRODUCT FEATURES AND RECOMMENDED USES

• A high-quality product especially for vacuum and industrial brushing machine application
• A concentrate paint with optimazed hiding power for planed and fine-sawn claddings
• Suitable prior to application of both water and solvent-borne exterior house paints by Tikkurila
• An all-round primer for sawn or planed timber
• Gives good protection for 6–10 months and a good priming coat for either water-borne or solvent-borne paint
• Can be thinned even 1:1 with water
• Suitable for priming of exterior boards and claddings

TECHNICAL DATA

Volume solids
46% (83V6001)
33% (83V6003)

Weight solids
64% (83V6001)
41% (83V6003)

Specific gravity
1.49 kg/l (83V6001)
1.14 kg/l (83V6003)

Recommended spreading amounts and theoretical coverage

<table>
<thead>
<tr>
<th>Recommended spreading amounts (thinned 1:1)</th>
<th>Theoretical coverage</th>
</tr>
</thead>
<tbody>
<tr>
<td>wet</td>
<td>dry</td>
</tr>
<tr>
<td>130 g/m²</td>
<td>24µm</td>
</tr>
<tr>
<td></td>
<td>9–10 m²/l</td>
</tr>
</tbody>
</table>

Practical coverage depends on the application method, painting conditions and the shape and roughness of the surface to be coated.

Drying times

<table>
<thead>
<tr>
<th>100–130 g/m²</th>
<th>+20°C</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dry to handle, loose timber, after</td>
<td>6–12h</td>
</tr>
<tr>
<td>Dry to stack, after</td>
<td>24h</td>
</tr>
<tr>
<td>IRM</td>
<td>3–8min</td>
</tr>
</tbody>
</table>

Drying and recoating times are related to the film thickness, temperature, the relative humidity of the air and ventilation.

Gloss
Matt.

Color shades
White in 1000 litres container, other shades from the Tikkurila House Paint color card. Avatint tinting system.
Pinja Opti Primer

APPLICATION INSTRUCTIONS

Surface preparation
Clean surfaces from dirt, dust and loose material. Assure that surface is free from mold and blue stain.

Recommended topcoats
Pika-Teho, Vinha, Ultra Matt, Ultra Classic, Teho Öljymaali, Ultra Pro, Pinja Pro, Pinja Top.

Choose the color of the primer in accordance with the color of the finishing paint. Finish the surfaces with Pika-Teho, Vinha, Ultra or Teho at the earliest after 24 hours from priming. In line production Pinja Opti Primer can be topcoated with Ultra Pro, Pinja Pro and Pinja Top.

Application conditions
The surface to be treated has to be clean and dry. The moisture content of wood has to be below 20%. During application and drying temperature of the air, substrate and product must be over +15°C and relative humidity of the air below 80%. Good ventilation is required to ensure optimal result.

Application
Stir the product carefully before use. Avoid making foam.

For airless spraying, the product is thinned approximately 50–100% to the viscosity 30–40s (DIN4). Recommended nozzle tip is 0.013”–0.015” and pressure 120–180 bar. Spray angle shall be chosen according to the shape of the object.

For air-assisted airless spraying, the product is thinned approximately 50–100% to the viscosity 30–40s (DIN4). Recommended nozzle tip is 0.013”–0.015” and pressure 40–140 bar. Atomising air pressure should be about 1–3 bar. Spray angle shall be chosen according to the shape of the object.

For conventional spraying, the product is thinned approximately 50–100% to the viscosity 30–40s (DIN4). Recommended nozzle tip is 1.6–2.0 mm and pressure 2–3 bar. Vacuum application according to manufacturer’s instructions.

Wood contains resin and other colouring extractives especially in knots. Temperature and humidity fluctuations may cause paint coat discolouration in these areas.

VOC
The Volatile Organic Compounds amount is 10 g/litre of paint.

Maximum VOC content in ready to use paint (thinned 100% by volume) is 5 g/l.

HEALTH AND SAFETY
Containers are provided with safety labels, which should be observed. Further information about hazardous influences and protection are detailed in individual health and safety data sheets.
A health and safety data sheet is available on request from Tikkurila Oyj.
