Pinja Priming Oil

DESCRIPTION
A water-borne registered wood preservative for priming. Best protection for wood.

PRODUCT FEATURES AND RECOMMENDED USES
- Penetrates well into wood protecting it against moisture, mold, blue stain and rot in outdoor areas. The bluish color makes it easy to distinguish the treated wood from untreated.
- Pinja Priming Oil has been approved under the rules of the Biocidal Products Regulation 528/2012/EC in Finland, Sweden, Norway, Poland and Estonia for use in classes 2 and 3. The product is listed in the database for building products that can be used in Nordic Swan Ecolabeled buildings.
- Not for use on wood in direct soil or in water contact or in marine environment.
- Not to be used on wood in direct contact with foodstuffs or animal nutrition.
- Not to be used indoors.
- For priming of wooden surfaces outdoors (classes 2 and 3).
- Can be used on wood components above grounds.
- Tested according to EN 152 (blue stain test) and EN 113 (wood rot test).
- Use the product only as wood preservative as described in product data sheet and label.

TECHNICAL DATA

Drying and recoating times are related to the film thickness, temperature, the relative humidity of the air and ventilation.

Gloss
Not measurable.

Color shades
Bluish. The product is not tintable.

Thinning instructions
No thinning.

APPLICATION INSTRUCTIONS

Surface preparation
Clean surfaces from dirt, dust and loose material. Assure that surface is free from mold and blue stain.

Recommended topcoats
Pinjalac Solid 30, Pinja Color, Pinja Color Plus, Ultra Pro, Pinja Pro, Pinja Flex Combi 25, Pinja Flex Combi 35.

and other Tikkurila’s paints and lacquers suitable for outdoor use.

Application conditions
The surface to be treated has to be clean and dry. The moisture content of wood has to be below 18%. During application and drying temperature of the air, substrate and product must be over +10°C and relative humidity of the air below 80%. Good ventilation is required to ensure optimal result.

In class 3 (outdoor use exposed to weathering): Do not use the product in the rain or if rain is expected in the next 24 hours.
Pinja Priming Oil

Application

Stir the product carefully before use. Avoid making foam.

For airless spraying recommended nozzle tip is 0.009”–0.011” and pressure 80–160 bar. Spray angle shall be chosen according to the shape of the object.

For air-assisted airless spraying recommend nozzle tip is 0.009”–0.011” and pressure 40–120 bar. Atomising air pressure should be about 1–3 bar. Spray angle shall be chosen according to the shape of the object.

For conventional spraying recommended nozzle tip is 1.0–1.4 mm and pressure 1.5–3.0 bar.

Wood contains resin and other colouring extractives especially in knots. Temperature and humidity fluctuations may cause paint coat discolouration in these areas.

In exterior use protect the ground with e.g. plastic. In spray application protect other surfaces and plants from splashes. Do not apply in such place (e.g. bridge above water), where there is a risk that the product would end up in the water. Apply the product in a place with good ventilation.

Freshly treated timber has to be stored under shelter or on impermeable hard surface. Possible paint drips have to be recovered for re-use or proper disposal.

Unprotected persons and animals should be kept away from the treated area 48 hours or until the surfaces have dried. Do not use the product near foodstuff, flatware or surfaces where foodstuff is treated. Use suitable protective clothing when treating the product or wood treated with the product. Prevent protective clothing from getting too stained with the used product.

If the surface treatment is anyhow delayed over 3 months, prime the surfaces again. Treated wood exposed to weathering has to be treated according to recommendations of use delivered with the product in question. The finished surface has to be kept in good condition.

Do not treat the surface with a product containing a triazole fungicide.

HEALTH AND SAFETY

After skin contact: Take off all contaminated clothing and wash skin with plenty of water and soap. Seek medical attention if symptoms occur. After eye contact: Rinse immediately with plenty of water. Seek medical attention if symptoms occur. If swallowed: Do not induce vomiting unless expressly instructed by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Seek medical attention. If inhaled: Move the affected person into fresh air. Keep person warm and rest. Provide artificial respiration by a trained person if breathing is irregular or arrested. Seek medical attention if symptoms are severe or long lasting. If unconscious place in recovery position and seek medical attention immediately.

Cleaning of equipment  Clean the equipment with water.

VOC  The Volatile Organic Compounds amount is 20±10 g/litre of the paint.

HEALTH AND SAFETY  Containers are provided with safety labels, which should be observed. Further information about hazardous influences and protection are detailed in individual health and safety data sheets. A health and safety data sheet is available on request from Tikkurila Oyj.

For industrial and professional use only.
