Pinja Pro Primer

**DESCRIPTION**

An all-round water-borne primer for fine-sawn timber.

**PRODUCT FEATURES AND RECOMMENDED USES**

- A water-borne all-round primer for fine-sawn timber
- Provides temporary protection for up to 10 months without a topcoat
- Makes the selection of a topcoat easy, as it can be topcoated with either water-borne or alkyd products
- Economical primer for claddings
- Flexible alkyd primer
- Suitable for priming of boards and panels for exterior cladding

| Specific gravity | 1.13–1.2 kg/l |

**Recommended spreading amounts and theoretical coverage**

<table>
<thead>
<tr>
<th>Recommended spreading amounts (unthinned)</th>
<th>Theoretical coverage</th>
</tr>
</thead>
<tbody>
<tr>
<td>wet</td>
<td>dry</td>
</tr>
<tr>
<td>135 g/m²</td>
<td>30 µm</td>
</tr>
<tr>
<td></td>
<td>9–10 m²/l</td>
</tr>
</tbody>
</table>

Practical coverage depends on the application method, conditions and the shape and roughness of the surface to be treated.

**Drying times**

<table>
<thead>
<tr>
<th>100–120 g/m²</th>
<th>+20°C</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dry to handle, loose timber, after</td>
<td>6–12h</td>
</tr>
<tr>
<td>Dry to handle, in stack, after</td>
<td>24h</td>
</tr>
<tr>
<td>IRM, after</td>
<td>3–8min</td>
</tr>
</tbody>
</table>

Note! Dark shades made from C-base will dry slower.

Drying and recoating times are related to the film thickness, temperature, the relative humidity of the air and ventilation.

**Gloss**

Matt.

**Color shades**

White 0301, iron oxide red 2931 and shades on the Wooden Facades colour card for exterior use. Avatint tinting system.
Pinja Pro Primer

APPLICATION INSTRUCTIONS

Surface preparation
Clean surfaces from dirt, dust and loose material. Assure that surface is free from mold and blue stain. Wood surfaces must be sanded with sandpaper P150–320. Sanding prior to the next application with sandpaper P240–400. All sanding dust must be removed.

Recommended topcoats
Pika-Teho, Vinha, Ultra Matt, Ultra Classic, Teho Öljymaali.

Finish the surfaces with Pika-Teho, Vinha, Ultra Matt, Ultra Classic or Teho Öljymaali at the earliest after 24 hours from priming.

Choose the colour of the primer in accordance with the colour of the finishing paint.

Application conditions
The surface to be treated has to be clean and dry. The moisture content of wood has to be below 19%. During application and drying temperature of the air, substrate and product must be over +5°C and relative humidity of the air below 80%. Good ventilation is required to ensure optimal result. Product can be dried with or without oven.

Application
Stir the product carefully before use. Avoid making foam.

For airless spraying, the product is thinned approximately 5–10% to the viscosity 30–40s (DIN4). Recommended nozzle tip is 0.013”–0.015” and pressure 120–180 bar. Spray angle shall be chosen according to the shape of the object.

For air-assisted airless spraying, the product is thinned approximately 5–10% to the viscosity 30–40s (DIN4). Recommended nozzle tip is 0.013”–0.015” and pressure 40–140 bar. Atomising air pressure should be about 1–3 bar. Spray angle shall be chosen according to the shape of the object.

Vacuum application according to manufacturer’s instructions.

Wood contains resin and other colouring extractives especially in knots. Temperature and humidity fluctuations may cause paint coat discolouration in these areas.

Thinners
Water

Cleaning of equipment
Water.

VOC
The Volatile Organic Compounds amount is 8 g/litre of paint.

Maximum VOC content in ready to use paint (thinned 10% by volume) is 8 g/l.

HEALTH AND SAFETY
Containers are provided with safety labels, which should be observed. Further information about hazardous influences and protection are detailed in individual health and safety data sheets.

A health and safety data sheet is available on request from Tikkurila Oyj.
