Temalac SC-F 80

DESCRIPTION
A glossy high-solids single-coat alkyd paint, containing anti-corrosive pigments.

PRODUCT FEATURES
• High film build properties
• For low VOC demands
• Recommended as a single coat system for blast cleaned steel surfaces both indoors and outdoors
• Good application properties
• The product has MED (Marine Equipment Directive) certificate no VTT-C-11978-15-17 and is thus accepted for painting surfaces inside the ships
• Recommended for steel framework, service platforms and different types of machinery and equipment

TECHNICAL DATA

Volume solids 56±2% (ISO 3233)
Weight solids 72±2%
Specific gravity 1.4 kg / l depending on colour.

Recommended film thicknesses and theoretical coverage

<table>

<tbody>
<tr>
<td>wet</td>
<td>dry</td>
</tr>
<tr>
<td>140µm</td>
<td>80µm</td>
</tr>
<tr>
<td>180µm</td>
<td>100µm</td>
</tr>
</tbody>
</table>

Practical coverage depends on the application method, painting conditions and the shape and roughness of the surface to be coated.

Drying time

<table>

</tbody>
</table>

Drying and recoating times are related to the film thickness, temperature, the relative humidity of the air and ventilation.

Gloss
Gloss.

Color shades
RAL, NCS, SSG, BS, MONICOLOR NOVA and SYMPHONY colour cards. Temaspeed Premium tinting.
# Temalac SC-F 80

## APPLICATION INSTRUCTIONS

<tr>
<td></td>
<td>Primed surfaces: Oil, grease, salt and dirt are removed from the surface by appropriate means. Repair any damage to the primer coat. Note the overcoating time of primer. (ISO 12944-4)</td>
</tr>
</tbody>
</table>

### Recommended primers

Temalac SC-F 80.

### Recommended topcoats

Temalac SC-F 80.

### Application conditions

All surfaces must be clean, dry and free from contamination. The temperature of the ambient air, surface and paint should not fall below +5ºC during application and drying. Relative humidity of the air should not exceed 80% during application and drying. The surface temperature of steel should remain at least 3°C above the dew point. Good ventilation and sufficient air movement is required in confined areas during application and drying.

### Application

In order to obtain an even, non-porous finish, spray a misty coat: first a thin layer, then let the solvents evaporate for 3–5 minutes and then apply the full coat.

Stir the product carefully before use.

For air-assisted airless spraying, product is thinned approximately 5–15%. Recommended nozzle tip is 0.011”–0.013” and pressure 160–200 bar. Atomising air pressure should be 2 bar. Spray angle shall be chosen according to the shape of the object.

For heated airless spraying, product is thinned approximately 5–15%. Recommended nozzle tip is 0.011”–0.013” and pressure 160–200 bar. Spray angle shall be chosen according to the shape of the object.

For conventional spraying, product is thinned approximately 15–20%. Recommended nozzle tip is 1.6-1.8 mm and pressure 3–4 bar.

### Thinners

Thinner 1006

### Cleaning of equipment

Thinner 1006.

### VOC

The Volatile Organic Compounds amount is 400 g/litre of paint.

VOC content in ready to use paint (thinned 20 % by volume) is 480 g/l.

### HEALTH AND SAFETY

Containers are provided with safety labels, which should be observed. Further information about hazardous influences and protection are detailed in individual health and safety data sheets.

A health and safety data sheet is available on request from Tikkurila Oyj.
