Dicco Crystal 30 White

Excellent white-color retention for the wood furniture and joinery industries

A new generation two-component acid-catalyzed topcoat with outstanding filling and hiding properties. Thanks to a new polymer Dicco Crystal 30 White stays brilliant white for a longer time and it is even easier to use than traditional products.

Dicco Crystal 30 White is semi-matt and contains no aromatic solvents. Developed for kitchen doors and furniture as a fast-drying durable paint with good chemical and mechanical resistance, it is also suitable for other wooden interior surfaces.

- Brilliant white for a longer time
- Easy to apply
- Outstanding hiding power

Dicco Crystal 30 White

WHITER THAN WHITE

Dicco Crystal 30 White has been developed as a high-performance topcoat, which is visibly whiter than all previous acid-catalyzed paints and stays white for a longer time.

FASTER DRYING

Dicco Crystal 30 White dries faster than traditional acid catalyzed paints. Painted surfaces can be sanded and stacked faster thus ensuring higher productivity.

THIXOTROPIC PAINT

Dicco Crystal 30 White is thixotropic and has excellent hiding power even on edges and grooves. The paint is easy to spray and it levels to a smooth finish with good filling properties.

Typical paint system with Dicco Crystal 30 White as topcoat

Treatment	Product	Application method	Wet film thickness
Priming	1-2 x Diccoplast primer	Spraying	100–150 g/m ²
Topcoat	1 x Dicco Crystal 30 White	Spraying	100–140 g/m ²
